Jeff,

As a Branch Manager of Allied Building Products Inc, I have had the opportunity to see first hand many builders' work in the New York-New Jersey area.

From the first time I stepped onto one of your construction sites, I knew that if I ever had the opportunity to build a home of my own, you would be my first choice to do the job. Your attention to detail and quality workmanship is evident in every home you have built. But good workmanship is only part of the undertaking. Most important is the utmost trust and confidence one can place in you to build a superior home.

Anyone who has built a home knows, it is a scary undertaking. However, you did not let me down and you have exceeded all expectations! From beginning to end, every detail was meticulously handled. Knowing that you would be on the site for each step in the construction, reassured me that every aspect of my home would be built with uncompromising quality. Your supervision in all aspects was flawless.

I congratulate you on being chosen to be featured in Builder-Architect Magazine. It is an accolade well deserved. I love my new home and I am proud to recommend you as my builder.

Sincerely,

Gary J. Finn
