*Dear Jeff,*

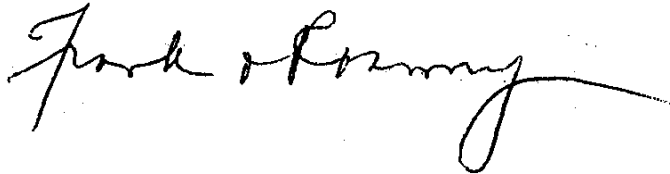

*Frank and I would like to thank you for building us such a spectacular home. It has exceeded all our expectations and we are truly fortunate that we chose you to build it. The experience of building a custom home with a builder who takes such pride in his work was incredible. You told us from the start that you would build the house as if it were your own. Well that turned out not to be just a sales pitch but the truth. Your constant watch and close supervision of each and every person involved in the project was really amazing. I know that no other builder would have given as much personal attention as you did. Your demand for perfection can be difficult for some to accept and work with but you never allowed your standards to be compromised. We really appreciate the care you took to see to it that everyone who set foot in the house was respectful of the work being done.*

*The year that we spent designing, building and decorating the house has been one of the most enjoyable and satisfying experiences of my life. We had some difficult situations but you were always there to do the right thing. I learned so much from this project and I thank you for your support and guidance. I know it wasn't always easy for you to work with people you did not have past experience with. I thank you for your patience (which I know is not your strong suit) and tolerance for things that may have not been your choice. You gave us your advice but respected our decisions.*

*We look forward to many happy years in our home and hope that our relationship with you will continue. We consider you a friend.*

*Thanks again.*

*Frank & Rosemary Porreca*

A handwritten signature in cursive script, appearing to read "Frank & Rosemary", with a long, sweeping underline that extends to the right.
