Dear Jeff,

It's hard to believe that it has been 17 years since you built our house. The house still feels like new! The quality of the construction is remarkable. As you well know, our location on the open bay has exposed us to some harsh marine elements. The salt air is very corrosive but thanks to the high-quality materials you used when building the house, the effects have been minimized. Frank and I really appreciate that you remain an active resource to us whenever we have issues or concerns. You have stood by your "product" 100%. Even with past warranty issues you have always addressed them and directed us to a satisfactory resolution.

Jeff, your exceptionally high standards are a tribute to the end result... A House Built to Last!

Thank you!

Sincerely,

Rosemary and Frank
