Dear Jeff and Laura,

After Lisa and I purchased our waterfront lot we asked our Realtor if he could provide us with a list of custom home builders in the area as we were new to the local Jersey shoreline. His response was the BEST advice we could have ever received – “If I was building my home there is only one Builder I would ever use, Jeff Folino from Jeffrey-Angelo Construction Company”. We cannot thank you enough for the beautiful home you have built for us. Every person who walks by compliments us, and every family member or friend who visits tells us how amazing your workmanship is.

We interviewed multiple builders where we reviewed the architect’s plans and shared our vision. However, something just “clicked” when we met with you. It just felt right. All the builders told us they would get back to us with a contract and price by a certain date but you were the ONLY one that kept his word. It made our decision to hire you an easy one. It was obviously the correct decision!

Your professionalism, attention to the smallest of details, dedication to our home, the high quality of your work and the fact that you were here seven days a week exceeded our expectations. You clearly take pride in your work and build homes as if they were your own. Like we like to say, there are high standards and then there are Jeff’s standards!

Building a new home can be stressful, there are so many choices to be made. All of the advice you provided is clearly appreciated. We are so happy – there is nothing we would change.

We also want to extend a big “Thank You” to Laura for keeping the process moving by applying for the various permits and scheduling all the Building inspections. We were able to move in ahead of schedule!

We will gladly recommend you to anyone looking for an outstanding custom home Builder. We will offer the same advice that we received – there is only ONE Builder you should use – Jeff Folino from Jeffrey-Angelo Construction!
